INTRODUCTION

The decentralized financial project Falcon - an innovation in the world of revolutionary solutions. Based on the principle of "the simpler the better", we combined the simplicity, speed and convenience of an Ethereum-based token with the privacy of an anonymous blockchain through a 1-to-1 permanent swap form, where the value and liquidity of an anonymous coin are determined by the token.

COMMON PROBLEMS OF MODERN ANONYMOUS BLOCKCHAINS

Different privacy coins may be good in their own way, but they all have the same disadvantages.

- Frightening global trend to regulate private coins;
- Widespread introduction of KYC and identity verification;
- Delisting anonymous coins from exchanges and outlawing them;
- A brand of suspicion on coin holders with basic privacy;
- A decline in the value, liquidity and a restricted usage environment.

THE SOLUTION FROM THE FALCON PROJECT

The FNC coin is free from all the disadvantages of using other privacy coins, thanks to a radically different approach to the way it is obtained and used.

- + Get your FNC coins using the basic FNT token, through a constantly available 1-to-1 swap form that does not store or collect your personal data;
- + After receiving FNC coins, you become completely invisible and enjoy using the privacy coin as you see fit;
- + You can always exchange your FNC coins back to the FNT token at a 1-to-1 rate;
- + Since the FNT token and the FNC coin are completely different chains, by owning the FNT token, you are not part of the mandatory privacy system and can only use this right at your own request;
- + The complete absence of trading pairs of the FNC coin ensures that there are no traces during registrations and trading operations;
- + FNC has a high underlying liquidity and value in line with the FNT tokens liquidity pools;
- + You can stay exclusively on the FNC network without ever returning to the FNT token. Maintain the network or participate in FNC PoS pools to earn additional revenue. Make your coins work;
- + FNC Peer-to-Peer settlements - you always know how much your coin is worth;
- + Returning to the FNT token, you once again become a regular and transparent member of the Falcon Project ecosystem with the ability to perform trading operations and use all kinds of system services and liquidity pools;
- + No one will ever know what you did last summer.

EARN MONEY IN A CONVENIENT WAY

DeFi NFTs Vouchers

Get up to 40% per annum in FNT tokens with the help of a limited issue DeFi NFTs voucher and “Proof of Hold” passive staking technology. Choose a voucher of the denomination that suits you: with 500,000, 1,000,000, 2,000,000, 5,000,000, 10,000,000 or 50,000,000 FNT tokens inside.
